

.223REM

VHS2S is a fully ambidextrous 223 Rem. caliber semi-automatic rifle.

Designed on bullpup modular platform with proved short-stroke gas piston operating system it maintains all the ballistic benefits of a longer barrel in a shorter package without sacrificing overall length, accuracy and muzzle velocity.

Adjustable gas block works in two modes; suppressed and unsuppressed. The polymer receiver is equipped with an 5 point adjustable buttstock.

The rifle is equipped with NATO STANAG 4694 rail and adjustable flip up iron sights. Front handguard has M-LOK mounting system at the 3, 6, and 9 o'clock positions. Pistol grip is removable and compatible with M4/AR-15 style grips.

Rifle is equipped with ambidextrous dual system of sling attachment; QD socket on front handguard, upper receiver and buttstock with eyelet attachment for sling snap hook on upper receiver and on the buttstock.

VHS2S is compatible with STANAG 4179 magazines.

Combination of all of this with dual dust cover ejection ports on both sides of the receiver and specially designed empty case defectors create flexible and user friendly multi-purpose rifle.
