

AK RIFLE

Modernized

BV-100 / 7.62X39mm

In terms of its performance characteristics, the carbine/sub-machine gun significantly exceeds such widely known original models as AK-47 and AKM.

In particular, the carbine/sub-machine gun has significantly improved accuracy (when shooting in short bursts) and density of fire.

Advanced in **full Picatinny rails** that allowed installing collimator, optical and optoelectronic sights.

Also a **flash hider** is used in the new BV-100 model.

Final, **special buttstocks** can be adjusted.
