AREX

zero 1

EXTREME RELIABLE AND ACCURATE

THE AREX ZERO 1 pistol does not claim to be a revolutionary breakthrough but you will find it represents a definitive evolutionary step in modern handgun design and manufacturing.

We have achieved improvements over some of the most popular designs, eliminating their weaknesses and enhancing their advantages by applying our expertise and state-of-the-art cad/cam processes.

The result is a best-in-class defensive pistol that boasts extreme reliability and accuracy along with a competitive price.

AREX delta can be optionally factory equipped with a universal reflex optics platform (Arex Optics Ready) a special recess milled into the slide. Five standardized mounting plates are included to provide secure and low profile interface for most proven miniature reflex sights ("red dots").

AREX

Delta Gen.2

STRIKER FIRED POLYMER HANDGUN

SAME, BUT DIFFERENT

The AREX Delta is a true double action striker-fired pistol.

As opposed to some hammerless pistols with fully cocked strikers, the Delta's striker spring is only partially compressed as a cartridge is chambered.

We have found our Striker Double Action system to be inherently safer than a single-action fully cocked striker.

The AREX Delta gen.2 is available in three basic variants but each may be ordered in factory Optics Ready configuration enabling you to further enhance the pistol with a reflex optical sight. The most compact - M variant is practically identical in size to the first generation AREX Delta and reverse grip frame compatibility has been maintained for your convenience.

Modular design enables you to customize the firearm to your needs and preferences.

Removable front and rear frame inserts incorporate slide guides and hold the complete fire control mechanism yet only the front insert is a serialized part that must remain with the firearm while everything else may be customized or exchanged if necessary or desired.
