

# Rotary Barrel Machine Gun CS/LM5 / 12.7mm

## TACTICAL MISSION and CHARACTERISTIC

CS/LM5 consists of gun body, fire controller, drive motor, power supply, upper mount, lower mount, ammunition box, link belt and simple optical sight.

It has a compact structure, and convenient electrical operation, meanwhile, the barrage immediately formed by the high rate of fire torrent could effectively deal with the low-altitude, ultra low altitude flying targets and the fast moving light armored targets.

It could be equipped on various armored vehicles, light or heavy ships to hit or suppress the water or air targets.

Caliber: 12.7 mm

Number of barrels: 3

Ammunition fired: 12.7x108 mm cartridge

Automatic mode: External energy source

Firing rate: 1,000 r/m (low speed)

2,000r/m (high speed)

Elevating limit: -8°

Effective range: 1,500m

Fire precision: <8mil (80% concentration )

Service life: >10,000 rds
