EXPECT THE BEST

Advanced engineering and ergonomics, state of the art safety solutions and flawless reliability are some of the qualities, that make the HS pistol a truly revolutionary handgun.

Built in Croatia's advanced HS Produkt production facility, this modern design is made to exacting tolerances using 21st century GNG machines and CAD-CAM systems.

The resulting handgun is what independent law enforcement evaluators are calling a "World Class Pistol" equaling or exceeding the best available anywhere.

The HS pistol incorporates 4 redundant safeties, one in the grip, a trigger safety, a firing pin (drop) safety, and an out of battery safety
