

# HOPLITE ARMS

Made in USA

# HOPLITE ARMS

## **EXTREMELY ROBUST**

Receivers are machined from one-piece solid steel, maximizing strength and reducing flex. Providing a design which incorporates an integral recoil lug, integral STANAG 4694 rail and limiting unneeded pieces not only reduces moving parts but increases reliability.

## **3 LUG BOLT**

3 lug design provides for a faster and shorter 60 degree bolt throw. Our precision machined three lug system also ensures consistent pressure distribution on the lug contact surfaces when the breech is locked and the firing commences; even with high pressure loads.

## **ENHANCED EXTRACTION**

Equipped with a proved M16 style extractor for superior extraction strength and reliability for use in the most adverse conditions.

## **SMOOTH OPERATION**

Our precision machined components guarantee a smooth operation of our receivers. Exacting manufacturing tolerances in our actions are tight, yet purposely designed with clearance allowing smooth function despite the sand and grit that might cause other actions to lock up completely.

# HOPLITE ARMS

## **RELIABLE CARTRIDGE EJECTION**

Hoplite Arms utilize a dual plunger system for reliable and strong case ejection.

## **EASY TO USE & MAINTAIN**

Field expedient bolt removal from the receiver using one hand, without having to press any buttons or pull any levers. Yet bolt removal cannot be performed by accident while shooting. Toolless bolt disassembly and assembly continues our design philosophy of simplicity.

## **MAGAZINE COMPATIBILITY**

Our actions are compatible with Accuracy International magazines. AI magazines combined with our action design guarantee fast and reliable cartridge feed.

## **QUICK STRIKER & RELIABLE IGNITION**

The striker in our actions is optimized to minimize the length of firing pin fall and the time it takes from trigger sear disengagement until primer ignition, in other words lock time. Having a short firing pin fall combined with fast lock time is advantageous to accuracy.

## KOPIS RIFLE

### MEDIUM TO LONG RANGE WEAPON SYSTEM

#### RECEIVER

##### **Hoplite Arms High Pressure Receiver System:**

- Receiver 42CrMo4, HRC 45, Salt Bath Quenched.
  - Breech Cylinder 34CrNiMo6, HRC 47, Salt Bath Quenched.
  - Bolt 34CrNiMo6, HRC 50, Salt Bath Quenched.
- 3 Lug, 60 degree bolt lift with 10 degree above horizontal.  
Integral 20 MOA base.  
Integral recoil lug.  
Double plunger ejector.  
M16 Style extractor.

#### CHASSIS/STOCK

##### **Hoplite Arms Doru Chassis:**

- Magpul Gen3 PRS.
- Ergo TDX-0 Deluxe Zero Angle Suregrip.
- Ergo SuperLite M-Lok 15" free float handguard.

##### **KMW Sentinel with Hoplite Arms DBM:**

- KMW LoggerHead Adjustable Cheek hardware.
- Gen II Limited Rotation Flush Cups x 5 positions.
- KMW L.O.P. Spacer System with Gen II KMW recoil pad.
- KMW Convertible Bipod Station with both Harris Plate and 1913 Pic Rail supplied.

#### BARREL

Bartlein/Tooley with "Heathen" muzzle brake.

#### CARTRIDGE(S)

Hoplite Arms Proprietary High Pressure Cartridges:

6mm Xiphos  
7mm Xiphos

.473 Bolt face cartridges  
(Production Level):

308 Win  
260 Rem  
6CM  
6.5CM

.540 Bolt face short action  
cartridges (Production Level):

7mm SAUM  
300 SAUM  
6.5 PRC

## ASPIS RIFLE

### LONG TO EXTREME LONG RANGE WEAPON SYSTEM

#### RECEIVER

##### **Hoplite Arms High Pressure Receiver System:**

- Receiver 42CrMo4, HRC 45, Salt Bath Quenched.
  - Breech Cylinder 34CrNiMo6, HRC 47, Salt Bath Quenched.
  - Bolt 34CrNiMo6, HRC 50, Salt Bath Quenched.
- 3 Lug, 60 degree bolt lift with 10 degree above horizontal.  
Integral 30 MOA base.  
Integral recoil lug.  
Double plunger ejector.  
M16 Style extractor.

#### CHASSIS/STOCK

##### **Hoplite Arms Doru Chassis:**

- Magpul Gen3 PRS.
- Ergo TDX-0 Deluxe Zero Angle Suregrip.
- Ergo SuperLite M-Lok 15" free float handguard.

##### **KMW Sentinel with Hoplite Arms DBM:**

- KMW LoggerHead Adjustable Cheek hardware.
- Gen II Limited Rotation Flush Cups x 5 positions.
- KMW L.O.P. Spacer System with Gen II KMW recoil pad.
- KMW Convertible Bipod Station with both Harris Plate and 1913 Pic Rail supplied.

#### BARREL

Bartlein/Tooley with "Heathen" muzzle brake.

#### CARTRIDGE(S)

##### **Hoplite Arms Proprietary High Pressure Cartridges:**

7mm Leonidas  
30 Leonidas  
338 Leonidas

##### **.540 Bolt face long action cartridges (Production Level):**

300 WM  
300 PRC

##### **.585 Bolt face cartridges (Production Level):**

300 NM  
338 NM  
338 LM

## PHALANX RIFLE

### EXTREME LONG RANGE/HARD TARGET INTERDICTION WEAPON SYSTEM

#### RECEIVER

##### **Hoplite Arms High Pressure Receiver System:**

- Receiver 42CrMo4, HRC 45, Salt Bath Quenched.
  - Breech Cylinder 34CrNiMo6, HRC 47, Salt Bath Quenched.
  - Bolt 34CrNiMo6, HRC 50, Salt Bath Quenched.
- 3 Lug, 60 degree bolt lift with 10 degree above horizontal.  
Integral 40 MOA base.  
Integral recoil lug.  
Double plunger ejector.  
M16 Style extractor.

#### CHASSIS/STOCK

##### **Hoplite Arms Doru Chassis:**

- Magpul Gen3 PRS.
- Ergo TDX-0 Deluxe Zero Angle Suregrip.
- Ergo SuperLite M-Lok 15" free float handguard.

#### BARREL

Bartlein/Tooley with "Heathen" muzzle brake.

#### CARTRIDGE(S)

**Hoplite Arms Proprietary High Pressure Cartridges:**

375 Krypteia  
416 Krypteia  
BMG bolt face cartridges  
(Production Level):  
50 BMG  
416 Barrett  
460 Steyr
