

Excavation tools and hammers Supplied in a green sturdy fabric bag.

NMT has a long history in the explosive ordnance disposal business. The first non-magnetic tools were designed and developed in collaboration with UK Navy engineers and divers.

NMT is specialized in the non-sparking, non-magnetic tools since 1922.

The requirements for NATO are outlined in STANAG 2897.

Antimagnetic devices in terms of the NATO Standardization Agreement are devices with an overall magnetic permeability value not higher than 5nT (Nano Tesla).

They are suitable for use as a part of EOD (Explosive Ordnance Disposal) equipment without the danger of triggering induction detonators even at distances lower than 0.3 m.

Users must rely on non-magnetic equipment and tools, only the use of such will allow them to approach a magnetically fused mine.

Most of the tools are made from Copper Beryllium alloys combining non-sparking, non-magnetic properties and high strength for use in tough conditions.

Other materials such as aluminum are also used.

They all fulfil the non-magnetic properties required by the STANAG norms. Titanium tools can also be provided on demand.

Excavation tools and hammers

Supplied in a green sturdy fabric bag

Kit contents 7 pcs

- Selection of hammers
- Selection of scrappers and chisels
- Pick & shovel

DESCRIPTION

- 1 x NMT 134R Round point Shovel
- 1 x NMT 135 Pick 560 mm head
- 1 x NMT 136 Pry bar, chisel & point 915 mm
- 1 x NMT 137 Sledge hammer 3.2 kg wih fibre glass shaft
- 1 x NMT 138 Club hammer 1.8 kg
- 1 x NMT 139 Chisel 25 mm x 25 mm x 300 mm
- 1 x NMT 145 Scraper 125 mm blade
- 1 x NMT145H Handle for NMT145
- 5 x NMT218 Tie Cable, 7.5 x 250 mm, Black

You can trust the industry experts at Non-Mag Tools to help you meet your EOD NMT needs. We are pioneers in manufacturing specialized Non-magnetic, Non-spark & Corrosive resistant EOD tool kits.

Superior material quality, product engineering and uncompromised quality control makes us an industry leader.

We have been protecting lives since 1922.

NMT CUSTOM MADE TOOLS & KITS: YOU HAVE A SPECIAL REQUEST? WE CAN RESEARCH WITH YOU ANY SPECIAL TOOLS OR KITS YOU MAY REQUIRE
