DAY/NIGHT TELEVISION GOGGLES

141.819 10

Day and night television goggles 141.819-10. The Goggles are designed for observation in twilight and at night during driving a vehicle or acting on foot.

A wide dynamic range of operation levels of illumination provides a possibility to use the Goggles not only in conditions of poor visibility, but also by a sunny day and in conditions of intensive reflection of light from snow.

To provide a possibility to work in conditions of complete darkness IR-illuminator of 940 μm is installed in Goggles.

To avoid fogging up of eye-lens the Goggles has two air exhausters.
